Thanks, Pat. There is no rush or pressing issue, I can wait until Nick returns. And yes, the alphabet soup we speak can be lyrical and funny at times.

Have a great weekend,

Hello Stephen,

Maria is out of town until next week so I thought I would quickly address your question. Nick Peak (378-5765) is our CAFO person (he will also be out of town until later next week). Nick is the one who can tell you if the AFO is a CAFO (sounds like a song collaboration between Willie Nelson and Dr. Seuss). I doubt that they have a permit since there was only one facility in Idaho that actually applied for coverage under the current permit (at least, that is my understanding). As I said, Nick will be late next week. If you need information before then, Maria or I can put you in touch with someone in Seattle who can answer your questions.

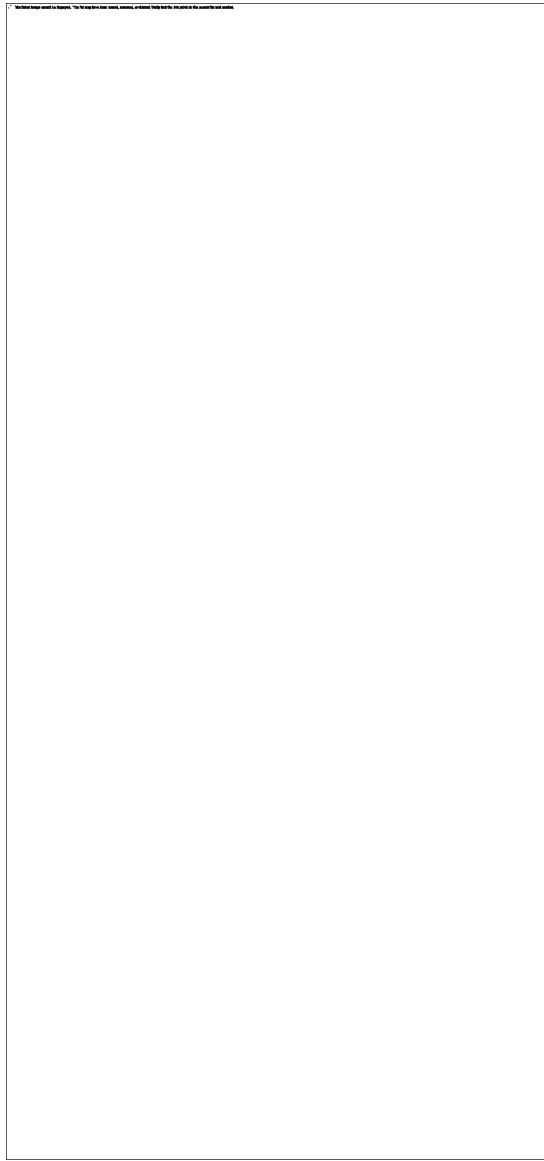

Pat

**Subject:** Swine AFO in Kuna

Hello Maria:

Does EPA know whether the Flying Pig Farm at 5400 Poen Rd., Kuna ID, 83634 is a large CAFO?  
<http://www.theflyingpigfarm.net/about-us.html>

I understand there was an administrative compliance order in 1998 (Case# 10-1998-0097) at a different location (Thornton Hog Farm), were they required to obtain a permit?

Thanks in advance,

Stephen Berry
